Greg:

I need to see if you can put together 2 Viper Systems for me.

It is my understanding that each system includes:

1 Gateway with extended Battery

1 Laptop

3 Links (set up for Multirae)

4 Multirae/Area Rae

Let me know what equipment that we have that can monitor for at a minimum VOCs/Hydrogen Sulfide that we have links for (multirae, area rae, etc). Weston has the Multirae PGM6228. Are the links compatable with this instrument?

I know we don't have aircards so I am going to see if I can get those from START. I will pick these up for Monday so if you could have them ready for Friday and set aside for me, I will pick them up Monday (if they let me travel) or Tuesday if they don't.

Lets Talk
